Lecture 2 : Arrays & Strings

Deadline

Sep 28, 2020, 11:59 PM

- Find an element
- Code : Rotate matrix 0/80
- Vectors
- Vectors 0/10
- Insert element 0/10
- What is the output 0/10
- What is the output 0/10
- What is the output 0/10
- What is the output 0/10
- string class

Assignment

0.0%

Score 0/800

- Sort 0 1 2 0/80
- Push Zeros to end 0/80
- Count platforms 0/80
- Leaders in array 0/80
- Print Like a Wave 0/80
- Print Spiral 0/120
- Reverse string Word Wise 0/80
- Largest Unique Substring 0/80
- Palindrome substrings 0/80
- Break words 0/40

Problem | Result

Largest Unique Substring

Send Feedback

Given a string S, find the largest substring with no repetition i.e. largest substring which contain all unique characters.

Input Format :

String S

Output Format :

Largest unique substring

Constraints :

1 <= Length os String S <= 10^3

Sample Input:

abcdabceb

Sample Output:

dabce

```
// input - given
// output - outpu
void findLargestU
    // Write your

}
```
